

Child Safety

Designed with safety in mind

Luxaflex[®]

Child Safety

At Luxaflex® we consider Child Safety a top priority. Offering safe and practical benefits for the entire home, including children's rooms, is an integral part of our design philosophy. All our products comply with the European EN 13120 (safety standard for internal blinds performance). Luxaflex® Child Safety solutions offer safe and practical benefits for children's rooms. Bright colours and fun designs ensures endless options for your home.

Awareness of basic household items, including window coverings, is important as children's curiosity grows without them being able to determine the dangers around them.

The ultimate in convenience PowerView® Motorisation

Imagine a world where your window coverings adjust themselves automatically, creating the perfect room ambiance morning, noon and night. That's the beauty of the Award winning PowerView® Motorisation. Just programme PowerView® to move your window treatments to the exact position you want and then control and schedule them using the intuitive PowerView® App on your smart phone, tablet or by using the remote control.

Safe and convenient operation

Luxaflex® offers many innovative lifting systems designed with safety, convenience and beauty in mind, from fully motorised options to cordless alternatives.

Easy hand operation

The revolutionary Luxaflex® LiteRise® system makes raising and lowering your window treatments easier than ever. Simply push to raise and pull down to lower - your shades stay right where you put them.

Simple operation

Award winning Luxaflex® SmartCord® uses a retractable cord that always remains the same length when opening or closing your blind.

Manual operation

Luxaflex® offers a wide range of manual options including wand, crank and chain operation with built in safety features.

General advice

Always purchase child safe blinds or retro fit your existing blinds with enhanced safety features. Buyers and users of blinds should be aware of the hazards that can be posed by unrestrained cords, braids, loop chains and wires, which may be hazardous to young children.

The following guidelines should always be considered:

- Young children can be strangled by loops in pull cords, chains, tapes and inner cords that operate the product. They can also wrap cords around their necks.
- To avoid strangulation and entanglement, keep cords out of reach of young children.
- Move beds, cots and furniture away from window covering cords.
- Do not tie cords together. Make sure cords do not twist and create a loop.
- Install and use the safety devices according to the installation instructions on these devices to reduce possibility of such an accident.
